

Features and Application of Wall Stickers

1. Material Introduction of Wall Stickers

The material of wall stickers and wall decals is translucent PVC film, 100% imported material. Zigpac wall stickers have the features of eco-friendly, waterproof, color fade-proof, no warping, rewashable, removable. Our custom wall decals are available to any color wall, tile, glass and smooth surface furniture. Adhesive glue is removable type, can be used many times, without injuring the wall. But you need to note that after long time used, the stickiness of wall stickers will become weaker, so the reusability will get down after a long time which is a normal phenomenon for all kinds of wall stickers.

2. How to Use Wall Stickers

Make sure the surface is smooth, and don't apply the wall stickers on corrugated and peeling surface, or some not dry painted surface.

Choose a proper position for the wall stickers. Clean up dust and grease to ensure the surface is dry and clean. Either simply planning for sticking procedure or DIY is Ok.

Gently peel wall [custom stickers](#) off the release paper without using transfer film, and stick wall stickers on middle firstly, then press outwards slowly.

3. Application of Wall Stickers:

Wall stickers are well applied for home decoration in kitchens, bedroom, washroom and other places you like. Wall stickers are a simple and practical way make your house have a new look. There are many wall stickers in different styles for you to choose in your home decoration. What's more, wall decals have become necessary accessories in many countries as beautiful decoration. You can even tell a person's taste and attitude for live from his choice for wall stickers.

Apart from home decoration, wall stickers are also frequently used in hotel, shopping mall, KTV, store, grocery, bakery and other commercial places for decoration.
